6) SOUNDBEAM SYSTEM	
<p>There has been proposal made for the soundbeam to be funded so that it can come to each service every fortnight. Each day service would have to pay £3,000 a year towards this. Also the soundbeam would be developed so that different sessions and themes were made available in order that service users were getting the test service from it. Each fortnight different groups and for individuals would be able to use it. So it would not be at the same group every time. Management in all day services are to look at the financial issue of this to make sure that it can be funded. This will be a management decision.</p> 	Day service management
